CERTIFIED SUPPLIER

ABOUT US

Established in 2020, New Energy Services Co. has been at the forefront of Steel Fabrication and Welding Work for all the Industries with a 100% Omani management team.

The company is an undisputed leader in the region, marketing a wide range of products and services serving the regional customer base across Oman.

Quality Policy – We, at NES, are committed to achieve total customer satisfaction by providing high quality products and services that meet and exceed Customer expectations. Our focus on continually improving our results is our means of achieving operational excellence & customer trust.

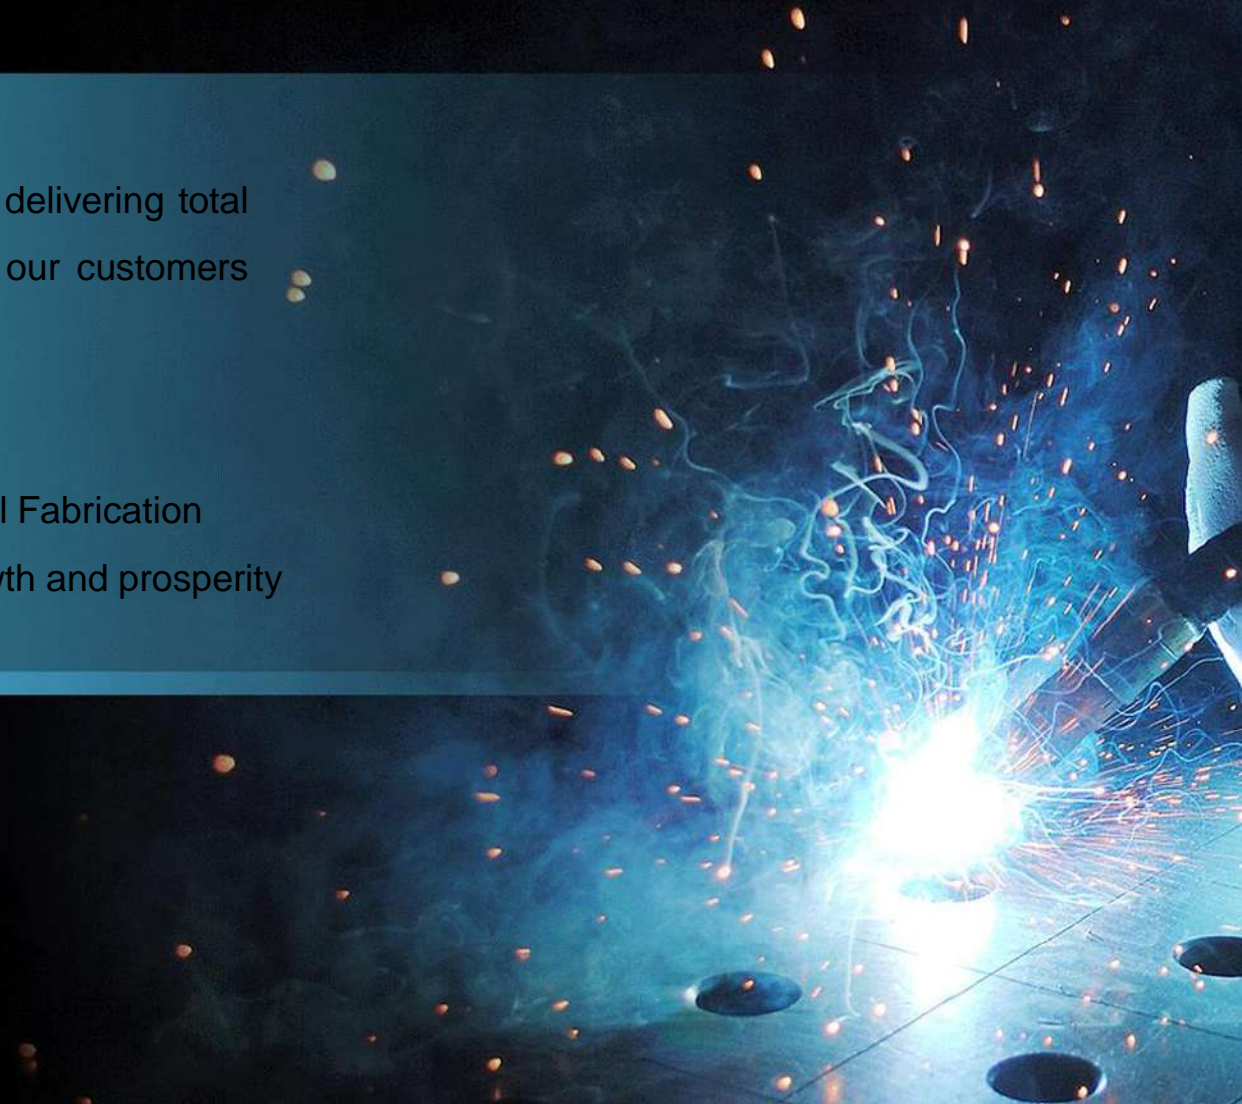

Our Value

Mission

To be our customers' trusted partner, delivering total business support solutions to enable our customers to focus on their core business.

Vision

To become the largest Welding & Steel Fabrication Workshop in the area, to facilitate growth and prosperity of business in Oman & GCC.

OUR Services

Custom Metal Fabrication:

We specialize in custom metal fabrication, offering tailored solutions to meet the unique requirements of each client. From design to fabrication, our skilled craftsmen ensure exceptional quality and attention to detail.

Welding & Piping Services:

Our team of certified welders is proficient in a wide range of welding techniques, including MIG, TIG, and ARC welding. We excel in precision welding, providing strong and durable joints for structural integrity.

On-Site Fabrication:

For added convenience, we offer on-site fabrication services, bringing our expertise directly to your location. Our mobile welding units are fully equipped to handle fabrication tasks efficiently and effectively.

Cladding Services:

We offer precision cladding services to apply wear-resistant layers to metal surfaces, protecting them from abrasion, corrosion, and erosion. Our advanced cladding techniques ensure uniform coating thickness and excellent adhesion, extending the lifespan of components.

Hard Facing:

Our hard facing solutions involve depositing a layer of hard, wear-resistant material onto metal surfaces to improve their resistance to wear and tear. Whether it's rebuilding worn-out parts or enhancing new components, our hard facing process enhances durability and performance.

Welding Services

MIG Welding:

Our certified welders are proficient in MIG (Metal Inert Gas) welding, a versatile process suitable for a wide range of materials, including steel, aluminum, and stainless steel. Whether it's automotive repairs, structural welding, or fabrication work, we ensure precise and durable welds.

TIG Welding:

We specialize in TIG (Tungsten Inert Gas) welding, known for its precision and aesthetic appeal. Our TIG welding services are ideal for applications requiring high-quality welds with minimal distortion, such as aerospace components, artwork, and sanitary piping.

Stick Welding:

Our skilled welders are also proficient in stick welding, also known as Shielded Metal Arc Welding (SMAW). This versatile process is suitable for outdoor and heavy-duty applications, providing strong and reliable welds on various metals, including carbon steel and cast iron.

Steel Fabrication

Custom Metal Fabrication:

We excel in custom metal fabrication, offering tailored solutions to meet the specific requirements of each project. Whether it's prototypes, one-of-a-kind pieces, or large-scale production, our skilled fabricators ensure exceptional quality and attention to detail.

Sheet Metal Fabrication:

Our sheet metal fabrication services encompass cutting, bending, and welding of sheet metal to create precise components and assemblies. We leverage advanced machinery and techniques to produce high-quality results with fast turnaround times.

Structural Fabrication & Erection:

We specialize in structural fabrication, producing beams, frames, and other structural components for buildings, bridges, and industrial facilities. Our expertise in structural engineering ensures that each component meets the required strength and safety standards.

Piping, Cladding & Hardfacing

Pipe Fabrication & Welding:

We offer custom pipe fabrication services to meet the specific requirements of each project. Using advanced equipment and techniques, we fabricate pipes of various materials, sizes, and configurations with precision and consistency.

Pipes & Valves Cladding :

We provide comprehensive consultation and support throughout the cladding and hard facing process, from initial assessment to post-application inspection. Our team of experts works closely with clients to develop customized solutions that address their specific requirements.

Hardfacing by Satellite:

Our hard facing solutions involve depositing a layer of hard, wear-resistant material onto metal surfaces to improve their resistance to wear and tear. Whether it's rebuilding worn-out parts or enhancing new components, our hard facing process enhances durability and performance.
